TECHNODOMUS 2010

innovation as the road for leaders

After the success of the 1st edition acclaimed by all operators in the sector, **TECHNODOMUS** is back and more ambitious than ever, promoted as a **leading market event for wood technology** applications in the building and furniture industries.

The focal point of a production district that leads the global scenario, **Rimini** is the new platform for product launches and for generating important and profitable business contacts.

The key players in the expo will be the **machines, accessories and tools for primary and secondary wood processing**. From industrial-scale systems to traditional machines, the **most advanced and innovative technologies** serving both large companies and small carpentry workshops.

TECHNODOMUS also places a special focus on the use of **wood in building**: from structural wood technology to carpentry, from load-bearing structures to homes. Integrated solutions for **eco-sustainable architecture**, environment-friendly and compliant with modern housing standards.

to every question... **an answer**
